Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, 41, 43, 45, 50, 52 and 19-36, 42, 44, 46, 51, 53, drawn to a method and an apparatus for matching prospective borrowers with prospective lenders to initiate and complete a loan process, classified in class 705, subclass 38.
- II. Claims 37-40 and 47-49, drawn to a method of assisting potential borrowers to obtain bank guarantees, classified in class 705, subclass 39.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because I is directed to matching prospective borrowers with prospective lenders, and invention II is directed to obtain bank guarantees. The subcombination has separate utility such as integrating data.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

The inventions are distinct, each from the other because of the following reasons:
